

## Model Year 1984

The 1984 model is the rarest with only 65 imported to USA. Starting in 1984, the ur-quattros were equipped with the desirable 15 by 8 inch Ronal R8 16 spoke wheels with 215/50VR15 tires. The rear valence was widened to cover the larger wheels. The factory also started to 'roll' the inner fender edges to eliminate tire contact with the body. The 1984 models had a restyled dash which is only used for this model in this year. It is brown in color and has a carpeted center console. The door pockets are full length and carpeted. The differential lock still uses 'pull' style switch. The A/C is now controlled with an on/off switch by the sliding vent controls. The electrical system is improved with the fuse box now located under hood on drivers side. The interior still has the 83 style diagonal stitching on the seats and door panels. And also like the 83 it has silver 'quattro' stickers on rear side windows. The rear bumper doesn't have bolt holes like the 83 model.

## Model Year 1985

The 1985 model seems to be the most desirable with only 73 imported to USA. Many of the updates the 1984 cars has were also carried over to the 1985 cars including the optional 15 by 8 inch Ronal R8 16 spoke wheels with 215/50VR15 tires, wider rear valance, 'rolled' inner fender edges. The 1985 did receive an updated interior which included a new style black dash which was shared with the 4000/4000Q/Coupe GT. The differential lock switch was changed to a rotary knob that was also used in the 4000 quattro. Located next to the differential lock switch were volt meter and oil temperature LED bargraph displays. To help eliminate trunk strut problems and lighten the car, a kevlar trunk lid was introduced which was painted body color. The rear spoiler was also painted body color. The front grill was now sloped like the 4000/GT models but the headlights were still 4 sealed beams The 'Audi' and 'quattro' labels on rear deck are now plastic instead of decals. The rear window now had 'quattro' spelled out in the rear defogger lines. As on the 1984 model the rear bumper doesn't have bolt holes.
